B55 Bin

ICE-O-Matic is the Best ICE Making Solution for: Hard Water, Food Safety and Tight Spaces

Problem

Solution

Optimal Bin Storage

Bin not large enough?

Multiple Solutions

255 pounds to 1866 pounds to fit all application needs

Ice Melts Too Fast

Inadequate bin insulation causes Ice to melt too quickly

Insulation

Each polyethylene bin liner is insulated with FOAM for maximum ICE PRESERVATION - 1.5 to 3 inches of insulation

Getting The Ice Out

High profile bin openings make it difficult to quickly and safely get Ice from the bin

Low Profile

Easily allows access to ICE without a stepping stool. Large door opening for scooping or shoveling ICE

Corrosion

Chlorine in the water causes corrosion of stainless-steel bin liners

Corrosion Protection

Polyethylene bin liners protect against corrosion

On The Level

Uneven floors cause water drainage problems

Adjustable Legs

6 inch adjustable NSF approved legs - standard
